COURSEWORK

UNDERGRADUATE
Data Structures & Algorithms
Object Oriented Programming
Computer Architecture
Foundations of AI
Cybersecurity Ethical Hacking

SKILLS

PROGRAMMING
C++ • Javascript • Python • SQL

FRAMEWORKS
Next.js • Node.js • Supabase • MySQL
Clerk.dev • Firebase

INTERESTS

Photography • Travelling

EXPERIENCE

LUXURY CHAUFFEUR AND TOURS | Web Developer Intern
Aug 2024 - Nov 2024 | Circular Quay, Sydney
- Revitalized the organization's digital presence by migrating WordPress booking system to a Next.js application, significantly improving website performance, user experience, and load times.
- Collaborated cross-functionally with SEO team to optimize website content and structure, enhancing search engine visibility and digital marketing effectiveness.

MAKITA AUSTRALIA | Storeperson
May 2022 – Aug 2024 | Pemulwuy, NSW
- Managed comprehensive product returns process for NSW retailers, accurately updating inventory systems and tracking daily operations to ensure precise stock control and seamless warehouse functionality.
- Led a team of two in clearing overflow stock, enhancing warehouse efficiency and maintaining optimal operational standards.

PROJECT

VGP FOUNDATION | https://vgpf.vercel.app/
Nov 2024 – Present
- VGP Foundation is a platform that enables users to find jobs, accommodations, and events nearby, as well as post job and accommodation listings.
- Designed and developed the entire platform, including frontend, backend, and integration with Firebase for user management and data storage.

ADAPT | https://adapt-mvp.vercel.app/
Feb 2024 – Nov 2024
- ADAPT is a data visualisation platform that uses Australia's previous census data to generate graphs and insights based on parameters such as geography, area, and data points.
- Developed the frontend using Next.js, focusing on responsive design and interactive data visualization features.

FOODHUB | https://hungr.vercel.app/
July 2023 – Nov 2023
- FoodHub is a food ordering platform that allows users to order food from nearby restaurants by browsing their menus, with the ability to filter options by food type and cuisine.
- Led frontend and presentation development, along with backend logic for seamless user experience and menu filtering functionality.
